

Postdoctoral position:

We are looking for motivated postdoctoral candidates to apply for a Juan de la Cierva (Formación or Incorporación) Postdoctoral 2 year Fellowship (JDC) at our laboratory at the CBM-SO in the UAM campus (<http://www.cbm.uam.es/myanez>)

Our group also belongs to the Instituto de Investigación Sanitaria Princesa that has been repeatedly granted with the *Best in Class* award for its research and innovation quality.

We aim to do traslational research from a basic cell biology perspective. We are interested in how membrane microdomains impact on exosome biogenesis, viral infection and tumor progression. We are also pursuing nanomedical developments based on synthetic exosome mimetics as vaccination moieties. We combine cell biology studies with microscopy to analyse the composition and function of adhesion platforms. We are looking for early postdocs with experience in fluorescence microscopy, molecular biology or animal models research.

Interested candidates please contact María Yáñez-Mó:
